Delivery Manager

Aug 2024 - Present

Project & Delivery Management: **Lead data projects and analytics teams** to deliver client-focused solutions.

- Lead migrations of legacy data products to modern infrastructures and spearhead development of new solutions including **data models, dashboards, and AI products** using dbt, Dagster, Airflow, Snowflake and Databricks with robust data governance frameworks.
- Manage cross-functional teams of **30+ professionals**, including data engineers, data analysts and analytics engineers, ensuring seamless collaboration and stakeholder alignment across multiple concurrent initiatives.
- Orchestrate over **10** projects simultaneously while overseeing **3000+** service hours monthly, optimizing resource allocation and maintaining consistent delivery timelines through strategic leadership.
- Engineer and deploy AI products from scratch - **intelligent agents, machine learning models, generative AI solutions, and chatbots** - expanding service offerings and driving increased client engagement.
- Lead stakeholder management efforts in expanding contracts with **major pharmaceutical companies** like Novo Nordisk and Bayer, driving significant revenue growth and strengthening client partnerships.
- Streamline project workflows by implementing agile practices, enhancing efficiency across multiple data and analytics streams.
- Drive strategic planning for tailored data strategies to address business needs, with a strong focus on enterprise-level clients in the pharmaceutical sector.
- Cultivate professional growth of team members by encouraging continuous learning and adoption of advanced data technologies, fostering cross-functional collaboration and leadership development.

Project Manager

July 2021 - Mar 2024

Project & Delivery Management: **Developed and executed project strategies** aligned with organizational goals and market dynamics, specializing in the energy sector.

- Drove a **30%** boost in project efficiency by strategically implementing two Business Intelligence solutions, fostering cross-project synergy and streamlined data analysis.
- Optimized project life cycle management efficiency by introducing agile and waterfall methodologies, ensuring the delivery of projects within the allocated resources and timeframe.
- Enhanced workflow efficiency by **40%** using project management and data visualization tools, including Jira, Microsoft Project, and Power BI.
- Boosted the average revenue per resource by **60%**, achieving this by proposing a new data modeling approach to streamline workflows and optimize resource allocation.

Product Owner & Scrum Master: **Defined product vision and strategy, led agile product development teams**, and ensured continuous improvement.

- Strengthened alignment between product development and strategic goals by **25%** through market-driven priority setting and strategic direction.
- Led and optimized Scrum events, including Sprint Planning, Daily Stand-ups, and Sprint Reviews, championing agile principles to enhance team agility and project responsiveness.

SKILLS

- **Technology Skills:** Project Professional, Project Online, Azure DevOps, Jira Cloud, Power BI, Tableau, SQL, NoSQL, ETL/ELT, dbt, Python, Apache Airflow, Apache Spark, Machine Learning, AWS, GCP.
- **Certifications:** Analytics Engineer Certified by Indicium, IBM Data Engineering Professional Certificate, IBM Data Science Professional Certificate, IBM Data Warehouse Engineer, Certified Scrum Master.
- **Languages:** Native Portuguese, English, Spanish.
